**Sub: Seeking permission to organize a one- day State Level Seminar on "Geography: The Beginning for the Beginners"**

Sir,

With due respect, I, on behalf of the Department of Geography in collaboration with IQAC, Polba Mahavidyalaya, would like to request your kind permission to organize a one- day State Level Seminar on "Geography: The Beginning for the Beginners" in the college premises. The proposed of the said seminar will be held on the 11<sup>th</sup> February, 2023. The date would be finalized accordingly to the convenience of the Resource Persons.

Proposed Resource Person:

- Dr. Golam Mostafa, Assistant Professor, Department of Geography, Kabi Sukanta Mahavidyalaya, Bhadreswar, Hooghly

Hope you would be kind enough to provide your administrative and financial permission for the forthcoming Seminars.

Thanks and Regards,

*Rituparna Hajra*

## Report of the Seminar

**Title:** Geography: The Beginning for the Beginners

**Speaker:** Dr. Golam Mostafa, Assistant Professor of Geography, Kabi Sukanta Mahavidyalaya

**Date:** 11<sup>th</sup> February, 2023

**Organised by:** Department of Geography & IQAC

**Venue:** Polba Mahavidyalaya (Room no. 202)

The seminar "Geography: The Beginning for the Beginners" held on February 11, 2023 at Polba Mahavidyalaya, offered a deep insight into foundational concepts in geography to beginners and enthusiasts. Dr. Golam Mostafa, Assistant Professor at Kabi Sukanta Mahavidyalaya, expertly delivered specific aspects of geography, including physical landscapes, climate patterns, ecosystems, and human-environment interactions. The program commenced with a speech by Mr. Rajesh Das outlining the seminar's objectives. This was followed by introductions and acknowledgments of the Teacher In-Charge (TIC) and the esteemed resource person, Dr. Golam Mostafa, Teacher's Council Secretary, Dr. Kali Prasad Mishra, Coordinator of Internal Quality Assurance Cell, Dr. Santanu Sengupta. The inaugural address was delivered by Mr. Narugopal Kaibarta, the respected TIC of Polba Mahavidyalaya, whose insightful remarks left a lasting impact on the audience. Subsequently, Dr. Rituparna Hajra, HOD, Department of Geography, provided an introduction to the esteemed speaker, highlighting his extensive knowledge and research background.

Next Dr. Golam Mostafa took the stage and delivered his lecture on the theme of the seminar. Through a series of insightful presentations and discussions, participants gained valuable insights into population dynamics, cultural landscapes, urbanization, and economic geography, gaining insights into the complex relationships between humans and their surroundings. Additionally, presentations showcased practical applications of geography in environmental management, urban planning, disaster risk reduction, and sustainable development, highlighting the field's relevance in addressing real-world challenges. After lunch break Mr. Ayan Banerjee, SACT, Department of Geography, Polba Mahavidyalaya deliver his lecture on "Geography: The Study of Landscape Evolution". He expertly delivered the evolution of landscape under the influence of natural forces such as erosion, weathering, and tectonic activity, along with human influences like urbanization and agriculture. Overall, the seminar successfully achieved its objective of igniting curiosity and enthusiasm for geography among beginners, providing a solid foundation for further exploration and learning in the discipline.

The seminar concluded with the valedictory session, during which Mr. Ayan Banerjee extended a vote of thanks, expressing sincere gratitude to all participants. Undoubtedly, the seminar met its expectations.

### Objective of the Seminar

The objective of the seminar titled "Geography: The Beginning for the Beginners" was to provide an introductory platform for individuals new to the field of geography, aiming to ignite curiosity, foster understanding, and highlight the relevance of geography in contemporary society. Through engaging presentations, discussions, and practical examples, the seminar sought to achieve the following goals:

- **Introduce Foundational Concepts:** The seminar aimed to familiarize attendees with fundamental principles and concepts in geography, including spatial analysis, physical and human geography, and the significance of geographic information systems (GIS) in modern society. By laying a solid foundation of knowledge, participants would gain a deeper understanding of the interdisciplinary nature of geography.
- **Spark Interest and Curiosity:** The seminar sought to ignite curiosity and enthusiasm for geography among beginners. By showcasing the diverse facets of the field, from physical landscapes to human-environment interactions, attendees were encouraged to explore further and delve deeper into geographic inquiry.
- **Highlight Practical Applications:** Through practical examples and case studies, the seminar aimed to demonstrate the practical applications of geography in addressing real-world challenges. Attendees were introduced to how geographic principles are applied in fields such as environmental management, urban planning, disaster risk reduction, and sustainable development, showcasing the relevance of geography in informing policy decisions and guiding land-use planning.
- **Lay a Foundation for Further Learning:** By providing attendees with a comprehensive overview of geography's foundational concepts and practical applications, the seminar aimed to lay a solid foundation for further exploration and learning in the field. Participants were encouraged to continue their journey in geography, whether through formal education, research, or practical application in their professional endeavors.

Overall, the objective of the seminar was to inspire curiosity, foster understanding, and highlight the importance of geography as a discipline that plays a crucial role in understanding the world around us and addressing pressing global challenges.

**A One-day State Level Seminar**

Organized by  
**Department of Geography**  
in collaboration with  
**IQAC, Polba Mahavidyalaya**

Presented by

**Dr. Golam Mostafa**

Assistant Professor of Geography

Kabi Sukanta Mahavidyalaya

E-Mail: golam@ksmv.ac.in

Geography is a comprehensive subject that includes a wide range of topics like origin of universe, solar systems, genesis of earth and its relief orders, geological time scales, the location of geographic regions; weather system; soils; physical features such as mountains, rivers, and other relief features; population composition; infrastructure; diversity of nature as well as people and their cultures, and many more. So, Geography is one of the essential disciplines of Social Science and its applied knowledge is used in our everyday life.

Geographers try to study the factors responsible for spatial distribution and variation of people, places with their locations. Physical geographers are keen to explain the phenomenon of evolution of landforms, tectonic movements, weather and climate, ocean characteristics and properties, flora and fauna. On the other hand, Human geographers explain the interrelationship between man and his physical environment. The Interface geographers study various physical and human aspects in the form of their interaction and interrelation. The study of the earth system with specific approaches by geographers has therefore developed specialized branches of geography.

This lecture is an attempt to have an understanding of different fundamental facets of geography and explanation of the fundamental concepts of Geography along with relevant examples.

# Geography: The Study of Landscape Evolution

## A One-day State Level Seminar

Organized by  
Department of Geography  
in collaboration with  
IQAC, Polba Mahavidyalaya

Presented by

**Mr. Ayan Banerjee**  
SACT, Polba Mahavidyalaya

Geography, as the study of landscape evolution, delves into the processes shaping the Earth's surface over time. It encompasses the investigation of natural forces such as erosion, weathering, and tectonic activity, along with human influences like urbanization and agriculture. Through fieldwork, remote sensing, and geographic information systems (GIS), geographers analyze landforms, track changes, and forecast future landscape dynamics. Methodologically, geography integrates diverse data sources and scales to reconstruct past landscapes and understand ongoing transformations. This interdisciplinary approach not only illuminates the natural history encoded in the Earth's surface but also sheds light on the impacts of human activities on landscapes. The significance of geography as the study of landscape evolution extends beyond academia, informing decision-making in fields such as environmental management, urban planning, and conservation. By unraveling the complexities of landscape dynamics, geographers contribute to sustainable land use practices and the preservation of natural resources and cultural heritage. In essence, geography provides a holistic perspective on the Earth's surface, illuminating the intertwined processes that shape our planet's ever-evolving landscapes.
